

SEAMS AND OVERHANG INFO

- ❖ All seams are at the discretion of *Centerline Stone*;
- ❖ Any requests for specific seam positions will be taken into consideration but will be dictated by slab size and veining. Any request must be submitted in writing at time of quoting and/or template.
- ❖ All counters that have an island will be in one piece unless the size of the slab and/or site conditions restrict *Centerline Stone* from doing so;
- ❖ Seams are noticeable to the eye and by touch. Every effort is made to minimize the appearance of the seam, but you will always see and feel a seam.
- ❖ Island and breakfast bar overhangs are limited to a maximum of 10" – 12";
- ❖ Overhangs exceeding the above specifications require corbels or brackets to support the countertop from below. These supports are NOT provided or installed by *Centerline Stone*;
- ❖ *Centerline Stone* will provide full build-up should the overhang require it. Full build-up is an additional charge. The build-up material is 3/4" plywood (as is, unpainted, unstained). Request for any other form of build-up must be made in writing at time of quoting and/or template.
